DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 17-24, drawn to a MIG welding power source and a MIG welding system, classified in class 219, subclass 130.1.
- II. Claims 7-16, drawn to a method of regulating an inverter power source used by a MIG welding process, classified in class 219, subclass 130.33.
- III. Claims 25-31, drawn to a method of controlling the output of a MIG welding power source based on detecting a short circuit, classified in class 219, subclass 130.21.

Apparatus invention I and process inventions II and III are related as processes and apparatus for their practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process.

(MPEP § 806.05(e)). In this case the apparatus of invention I can be used to practice processes other than those of inventions II and III, namely processes that do not involve the determination of a maximum allowable voltage error as in invention II or the detection of a prolonged short circuit as in invention III.

Art Unit: 1725

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as in a process that does not involve the step of using an inverter power supply as in invention II or the step of determining a maximum allowable voltage error as in invention II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication should be directed to Clifford C Shaw at telephone number 571-272-1182. The examiner can normally be reached on Monday through Friday of the first week of the pay period and on Tuesday through Friday of the second week of the pay period.
